

THE PROTEIN DATA BANK

NEWSLETTER

Number 11

January 1980

We are pleased to announce that Professor Harold Scheraga of Cornell University has agreed to serve on the Protein Data Bank Advisory Board for a three-year term. Also continuing on the Board are Dr. David Davies (NIH) and Professor Michael Rossmann (Purdue). At this time we would like to express our deepest appreciation to Professor Ken Neet of Case Western Reserve University for having served on the Board since its inception in 1975. The Advisory Board was formed to oversee the Data Bank and continues to provide advice, support and perspective for our activities.

Thomas Koetzle will be attending the Alabama ACA Meeting March 17-21, and Enrique Abola will be at the West Coast Protein Workshop at Asilomar March 16-19. We will be delighted to discuss the Data Bank with users, contributors and anyone who may be interested. We are especially eager to receive suggestions for improvements and new services which we may offer.

We have just finished analyzing the returns of the questionnaire sent out last year to data recipients. The survey was designed to aid us in planning for future activities, and the replies have helped us to understand the makeup of our present user community and suggest additional types of services we could offer that might be found generally beneficial. Out of 91 questionnaires mailed, 38 were returned. Interestingly, half of those responding are crystallographers and half belong to other disciplines. More than three-quarters of the replies indicated interest in our plans to develop new computer programs which operate on the atomic coordinate data. Only about a quarter of the responses indicated use of the Data Bank in teaching, and we are currently exploring possibilities whereby the Bank can have a greater impact in this area (e.g. in courses on molecular structure/function relationships). The comments from the questionnaire were generally favorable and encouraging, and we intend to incorporate several of the specific suggestions as part of our future plans.

Up-to-date holdings information is given in Tables 1-5. The Bank continues to grow, and a total of 126 atomic coordinate entries are now available for distribution. The deposition by Professor Rossmann of coordinates for the coat protein of southern bean mosaic virus has added yet another dimension to our holdings. We are optimistic that in the very near future, coordinates from other viruses will become available.

A list of substantive corrections which have been applied to the coordinate entries since the last Newsletter is given in Table 6. The complete set of corrections is available on microfiche from Brookhaven free of charge. All new requests are automatically filled with the latest data including all corrections.

It is expected that the Protein Data Bank be acknowledged in publications which result from work making use of the Bank's services. In citing the Protein Data Bank in print, we suggest that a reference be included to F. C. Bernstein, T. F. Koetzle, G. J. B. Williams, E. F. Meyer, Jr., M. D. Brice, J. R. Rodgers, O. Kennard, T. Shimanouchi, and M. Tasumi, *J. Mol. Biol.* 112, 535-42 (1977). We would appreciate receiving reprints.

Charges

A revised schedule of charges for requests to Brookhaven is given in the request form. The data preparation charge for distributions on magnetic tape has risen slightly (from \$55.20 to \$63.80 per tape). To ensure proper payment and prompt distribution, please use this current form for requests to Brookhaven or Cambridge; users in Australia and Japan should contact their centers for ordering information.

THE CORRECTIONS IN THIS TABLE ARE GIVEN IN THE FORM OF 'UPDATE' DIRECTIONALS AND CONSIST OF 'UPDATE' DIRECTIVES PLUS NEW DATA RECORDS THAT ARE TO BE INSERTED OR THAT REPLACE ERRONEOUS RECORDS IN CERTAIN DATA BANK ENTRIES. 'UPDATE' IS THE CDC LIBRARY-FILE MANAGEMENT SYSTEM UNDER WHICH THE MASTER PROTEIN DATA BANK FILE IS MAINTAINED. FOR A DESCRIPTION OF 'UPDATE' USERS ARE REFERRED TO THE 'UPDATE REFERENCE MANUAL' PUBLICATION NUMBER 68342500. CONTROL DATA CORPORATION, ARDEN HILLS, MN. 1974. BRIEFLY, EACH DATA ENTRY IS GIVEN AN IDENTIFICATION CODE WHICH ALSO SERVES AS THE UPDATE 'DECK' NAME. EACH RECORD IN THE FILE IS IDENTIFIED WITH TWO TAGS. THE FIRST TAG IS SIMPLY THE 'DECK' NAME (OR AN 'IDENT' NAME -SEE BELOW) AND THE SECOND IS A SEQUENCE NUMBER WITHIN THE 'DECK' (OR 'IDENT'). THESE TAGS ARE INCLUDED IN CHARACTERS 73-80 OF THE RECORDS IN EACH DATA ENTRY AS DISTRIBUTED.

CORRECTIONS MAY BE MADE USING 'UPDATE' DIRECTIVES TO 'INSERT' NEW RECORDS OR 'DELETE' OLD ONES. EACH CORRECTION SET BEGINS WITH A '*IDENT' DIRECTIVE. THIS IDENTIFIES THE CORRECTION SET, E.G. AS '*IDHHA' FOR THE (CHRONOLOGICALLY) FIRST CORRECTION TO DECK 'IDHHA' FOR SPERM-WHALE HYGLOBIN. '*IMHB' FOR THE SECOND CORRECTION, ETC. '*DELETE' DIRECTIVES SPECIFY A RECORD OR INCLUSIVE RUN OF RECORDS TO BE DELETED. IF DATA RECORDS OCCUR IMMEDIATELY FOLLOWING '*DELETE', THESE ARE TO BE INSERTED IN PLACE OF THE RECORDS DELETED. '*INSERT' DIRECTIVES ARE USED TO SPECIFY A PARTICULAR RECORD AFTER WHICH INFORMATION IS TO BE INSERTED. THE RECORDS TO BE INSERTED FOLLOW IMMEDIATELY AFTER '*INSERT' IN THE CORRECTION SET. WITHIN EACH CORRECTION SET NEW RECORDS PLACED IN THE FILE ARE GIVEN THE 'IDENT' NAME AND NUMBERED SEQUENTIALLY.

REQUEST FORM

1. Name _____ Date _____
Address _____ Telephone _____

2. Send the following information (please check):

- description of atomic coordinate entries (no charge)
- the magnetic tape items listed below (from Table 1)

(Item "DATAPRTP" comprises all atomic coordinate sets and programs)

- the microfiche items listed below (from Table 2)

3. Tape: I am sending a new 2400 foot reel of magnetic tape yes no

4. Tape format desired:

- 7 track 556 cpi BCD-7 track only Unlabelled (preferred)
- 9 track 800 cpi ASCII-9 track only Labelled, - User's label
- 1600 cpi EBCDIC-9 track only

Retained

NOTE: All current coordinate entries and programs can be written to one 2400' reel of magnetic tape for one unit charge (see over) if some space economies are achieved by blocking the records. Please indicate here the maximum block size permitted if this is less than 5120 characters (bytes)_____.

(Please complete reverse side)

REQUEST FORM

5. Charges

(i) For requests to Brookhaven

- A. Data preparation (\$63.80 charge per magnetic tape) \$ _____
- B. Magnetic Tape (charge per tape) \$ 8.85 \$ _____
(please include if answer to 3 above was NO)
- C. Postage (per magnetic tape) \$ _____
U.S. and Canada \$ 2.00 () \$ _____
Air Mail to Other Countries \$17.00 () \$ _____
- D. Microfiche items (Price from Table 2) \$ _____
- E. Total Charge \$ _____
- F. Payment to the order of Brookhaven National Laboratory
by () check is () enclosed
() purchase order number _____ () sent separately
to the Protein
Data Bank

Brookhaven requires that either a check or actual purchase order be received before data are shipped. Inclusion of check with order will expedite processing.

(ii) For requests to Cambridge

- A. Data preparation and postage (per user-supplied tape) _____
Within United Kingdom £ 27.50 ()
Elsewhere £ 35.00 ()
- B. Magnetic tape £ 8.00 ()
(please check if NO was checked on 3 above) _____
- C. Microfiche (please inquire for prices) _____
- D. Total Charge _____

Please return to
